

**2021-2022 Discovery Speaker Series** - Tune in to our Facebook live every 1st Thursday of the month for new talks with artists, educators, scientists, and Earth advocates October 2021 - March 2022.

## Water Quality

**March 3<sup>rd</sup> @ 6:30pm**

We will be hosting students from Marshall Middle School who are looking into the health of our watersheds. These students have been conducting water quality testing in the Deschutes River to measure the health of our ecosystem. They will walk us through the ideal conditions for salmon populations and what their collections tell us about the health of the river. Additionally, we will hear about South Sound Green's larger water quality program and get a brief introduction to the Student GREEN Congress. This talk will give everyone a deeper understanding of the interconnected nature of our watersheds and a look into the state of our estuaries.

**Runoff can harm our waterways**
